The termination or invalidity of types of civil liability insurance in Iran

Abstract

Insurance is a risk-based contract whereby one party undertakes to pay in cash or in cash. On the other hand, in the event of an accident, the damage will be compensated for him. In this case, one kind of insurance, Civil liability insurance is of particular importance among the various types of insurance. In this type of insurance, The insurer, in return for receiving the premium from the insurer, undertakes that if the risk of the insurance is realized, Compensation for damages to third parties.

The method of collecting information is a library. In the library, important and useful content of books and articles and credible sources was searched and then categorized into the topic.

Termination and termination of this contract as well as other contracts are possible in the event of a combination of the conditions envisaged by the law, and if there is any termination or cancellation of this type of contract, the works will be created by the parties to the contract.

The results showed that in Iran's law, such as insurance, they are a marriage contract, there is a way to cancel it. The basis of civil liability in insurance policies also includes the rules of loss, misconduct, misconduct and fault. With the death of the insured, all rights will be transferred to the heirs.
